ID TECH VP3350
Mobile Card Reader

Compact PTS6.X payment device

NMI has added the VP3350 series of EMV contact and contactless card readers to the range of devices supported on the payment gateway. These devices are designed to partner with smartphones and tablets to provide secure, convenient, and low-cost, mobile payment acceptance.

KEY FEATURES

- All card types accepted. EMV contact and contactless with fallback to mag-stripe
- Direct connection to smart device. Fold-out Lightning or USB connector plugs in directly
- Multiple bank certifications. Certified with major US bank processors
- Bluetooth-only version for wireless connection. Can be used with any smart device or PC
- Long battery life. Take up to 500 transactions from a single charge

BENEFITS

- The simplest way to accept fully EMV compliant card-present transactions from an iOS or Android mobile device. Perfect for most small businesses wanting to accept card payments wherever their business takes them.

- Works seamlessly with the NMI iProcess mobile payment app, with transactions being authorized within seconds.

- Despite its small size and convenient plug-in or Bluetooth connection, it maintains full EMV security, and encrypts card data at the point the contact or contactless card is read.

- Full reporting is available both on the app as well as on the NMI merchant portal, so you can keep track of sales, and refunds as you manage your business.

- Hard-wired connection is straightforward and requires no pairing or configuration. A pass-trough charging connector means you can charge the card reader as well as your mobile device at the same time.

TECHNICAL SPECIFICATIONS

Specifications are reproduced in good faith from the manufacturer's datasheet. Specification parameters critical to your application should be verified with ID TECH prior to purchase.

Parameter	ID TECH VP3350
Certifications	• EMV Contact L1 & L2 • Contactless L2: Visa, Mastercard, • Amex, Discover. Apple Pay, Google Pay • PCI PTS 6.X • Mastercard TQM, FCC, CE.
Payment schemes	Visa, Mastercard, Amex, Discover
Interface options	• Apple Lightning connector • USB C • Bluetooth BLE
Display	4 LED indicators
Signalling	Buzzer
Power	Internal lithium battery (400mAh)
Battery life	• 500 EMV contact transactions • 400 EMV contactless transactions
Size	67 x 71 x 13.5
Operating temperature	0ºC to 55ºC
Storage temperature	-20ºC to 60ºC
