Simple Payment Acceptance On Your Phone

Accept contactless payments *directly* on your device.

NMI's Tap to Mobile is a simple mobile card acceptance solution that doesn't require any external hardware, just an Android phone or tablet.

With its easy-to-use app you're always ready to take payments anywhere, anytime.

KEY FEATURES

- Simple to set up and use–merchants can accept contactless payments in minutes
- Uses the trusted "Tap on Phone" technology from Mastercard
- App supports tipping and the ability to void (cancel) transactions
- PCI DSS certified security–uses the same encryption technology as a normal terminal
- Low cost processing, aimed at mobile, small to medium-sized businesses

BETA REQUIREMENTS

- A merchant account (MID) with Finaro (UK & EU) or TSYS (US)
- An NMI gateway account through an NMI partner
- An Android phone or tablet running Android version 10 or later
- Mobile data or Wi-Fi coverage in the location where payment is to be taken

BENEFITS

- Contactless acceptance is as quick and easy as any POS terminal, but without the hassle of external card readers or dongles
- The lowest cost way to accept cards for merchants on the move
- Access to the gateway portal for management and reporting of all transactions–mobile, online and in-person
