

## **Card on File is more effortless than ever.**

### **Bridge™ Payments with Card Account Updater.**

Stored cards and payment plans are convenient for providers and patients alike, until the inevitable happens: cards expire, accounts close, and lost or stolen cards get replaced, causing transactions to fail and sending staff to track down patients and manually update their accounts.

### **Card Account Updater helps practices avoid this cycle before it happens.**

**With Card Account Updater in Bridge Payments, practices have payment peace of mind. Process more payments reliably and successfully, and spend less time keeping up with card information.**
