

# iPays

## GATEWAY

## GAME-CHANGING SOLUTION

The iPays Gateway has every feature you could ever want!

## FEATURES

### INTERCHANGE OPTIMIZATION

iPays gateway automates the manual process of adding level 2 and 3 data to each transaction, resulting in big savings

### 3D SECURE

3D Secure packs on additional savings, all while protecting you from fraud.

### ACH/CHECK PROCESSING

ACH processing built right into the virtual terminal, giving you even more ways of accepting payments.

### RECURRING PAYMENTS

Easily create and manage subscription or scheduled payments that fit your customers' exact needs.

### MULTI-LOCATION CAPABILITIES

Multiple locations or divisions accessed through one master account.

### ELECTRONIC INVOICING

Built-in electronic invoicing suite, allowing you to easily collect payments by email or text message to your customers.

### CUSTOMER VAULT

Securely charge, view or edit a customer's card with the click of a button

### FRAUD PROTECTION

With 11 modules and extensive customization, the security of iPays gateway is second to none.

### CUSTOMIZED SURCHARGING

Choose the fully compliant cash discount, dual-pricing or a "service fee" option to save your business even more.

### HOSTED PAYMENT PAGES

Build customized and comprehensive payment forms and links in minutes.

PAYMENT  
SUCCESSFUL
